

FISCAL NOTE

HB 2787 - SB 3012

February 11, 2000

SUMMARY OF BILL: Specifies that a municipality's power of eminent domain in regard to sewer and water systems, gas pipelines and drainage ditches would apply even when the property in question is held or used for a public purpose by corporations, associations or persons also having the power of eminent domain provided that this prior public purpose or use not be interfered with by the exercise of such power by the municipality.

ESTIMATED FISCAL IMPACT:

Decrease Local Govt. Expenditures - Less than \$100,000

Impact depends on situations arising where municipalities need access to property which is held by another entity having the power of eminent domain. The expenditures associated with gaining access to that property under current law including legal fees would be eliminated by this act. The decrease in expenditures is estimated to be less than \$100,000 annually.

CERTIFICATION:

This is to duly certify that the information contained herein is true and correct to the best of my knowledge.
